

Tireplast Mud Flaps

This recycled rubber is a combination of recycled rubber (from tires) and plastic, tireplast is environmentally friendly and allows for custom product specifications. A great replacement for most natural and synthetic rubber, tireplast has low temperature impact toughness, tensile strength, flexibility, and sound deadening capabilities. Tireplast is resistant to many chemicals including alcohol, anti-freeze, diesel fuel, gasoline, grease, hydraulic oil, kerosene, motor oil, distilled water, and salt water.
