G-FORCE AERODYNAMIC MUD FLAPS

The Ultimate Aerodynamic Mud Flap Reduces Fuel Costs!

Mud Flaps & Accessories

Part Number	Description	Weight Per Pair
GT-2424GFB	24x24 G-Force Aerodynamic Flap	10 lbs.
GT-2430GFB	24x30 G-Force Aerodynamic Flap	12 lbs.

- Reduces Fuel Costs
- Reduces Spray
- Anti-Sail
- Cold Temps to -42 degrees
- Optional LED light

Endorsed by Wright-Patterson Air Force Base

"Symmetric wing shaped airfoil design for each rib provides lowest drag coefficient optimizing air flow and improving fuel efficiency. Aerodynamic design allows air to through reducing movement of mud flaps at higher speeds maintaining their protective function. Vertical and angled ribs help to dissipate moisture and debris in a safe manner at all weather conditions and speeds. The G-Force 400 is weighted at an optimal 4.5 pounds and will not flex, bend or rotate at higher speeds. As an engineer I endorse this product due to its aerodynamic angled rib foil design allowing air to pass through yet keeping its protective function giving customers a fuel efficient durable mud flap."

John G. Czikk, C-130 Avionics Modernization Program Engineer
Wright Patterson Air Force Base, Dayton, Ohio

G-Force Aerodynamic Mud Flaps are offered as standard non-logo mud flaps only.

For current availability, use the standard G-Force part numbers listed above. Custom logo printing is no longer offered for this product line.

Tear Resistance

The resistance to growth of a nick or cut when tension is applied to the cut specimen. (ASTM D-624.)

Tensile Strength

The tensile strength of a rubber compound is its resistance to rupture under tension. It is measured as strength at break and expressed in pounds per square inch of cross section. This property has an absolute value in some applications where the product is actually subjected to tension in service but, like the other tension properties, it is most frequently used in evaluating compounding materials on a cooperative basis.

In a series of cures with a variable time factor the tensile strength either passes through a maximum or exhibits a marked change in the slope of its curve. Therefore, the tensile strength may be considered either separately or together with the modulus and elongation in defining an optimum state of cure for any specific compound.

5/16" STANDARD RUBBER MUD FLAPS

Globetech's Standard Mud Flaps

Globetech uses the finest material available to mold its standard mud flaps. These are the most popular mudflaps for logo use.

This material also meets all MIL-SPEC for Military Contractors.

Mud Flaps & Accessories

Our 5/16" Standard splash guards are slightly heavier than our Chevron flaps. The majority of our customers prefer the Standard flap for their Custom logos.

Correlation of Constrained Path Tear versus Off Road Tire Performance

The chart below illustrates the degree of correlation between CP tear strength at 100°C and the cuttingchipping rating of a series of compounds in an off-road tire performance test.

XTREME MUD FLAP

- Our Xtreme Mud Flap is molded from high tensile strength rubber. Using conveyor belt technology, a wire of nylon sheet is molded into the mud flap for greater durability.
- Great for dump trucks and off-road use
- Highest tear strength of any mud flap
- Stiffer flap prevents waving
- Available with silk-screen or raised molded logo

TIREPLAST MUD FLAPS

This recycled rubber is a combination of recycled rubber (from tires) and plastic, tireplast is environmentally friendly and allows for custom product specifications. A great replacement for most natural and synthetic rubber, tireplast has low temperature impact toughness, tensile strength, flexibility, and sound deadening capabilities. Tireplast is resistant to many chemicals including alcohol, anti-freeze, diesel fuel, gasoline, grease, hydraulic oil, kerosene, motor oil, distilled water, and salt water.

QUARTER FENDER MOUNTING INSTRUCTIONS

Recommended quarter fender mounting will result in maximum fender and top flap product life.

50-foot pounds of torque is needed on the steel clamp and 75-foot pounds of torque is needed on the stainless clamp. This torque is to be applied to the nut instead of the bolt. When this torque is applied, the flange end of the clamp should touch.

BRACELESS STANDARD QUARTER FENDER

Globetech's standard hub caps are die-cast from a 380 aluminum alloy. They resist cracking, warping and breaking in any conditions.

- Each hub cap is individually poly-bagged.
- Vent plug is molded in a nitrile rubber.
- Dow Corning CALIBRE lens, UV-stabilized.

Description: GT-8011 is a low density cellulose fiber material with high rubber filler content and a nitrile butadiene rubber binder. It provides excellent sealing of oil and water at low flange pressures, and is used primarily for engine and transmission pan gaskets, water pumps, and environmental seals. It is intended for applications with short duration maximum temperatures up to 180°C (350°F). GT-8011 has UL component recognition.

TEMPBOLT™

Patented

Avoid expensive bearing failures, unscheduled down time, costly road service calls and missed delivery appointments. Install the new **Globetech TempBolt™** in the hubcaps of your tractors and trailers today.

A **Globetech TempBolt™** installed in your hubcap can warn you of pending bearing problems. The TempBolt's visual red indicator pops out if the hub temperature reaches or exceeds 250° F. Only one **TempBolt™** is needed for each hubcap. This product is not a replacement for a rigorous hub preventive maintenance program.

- Tested and Approved by the TRUCK OEM Technical Center
- Several brake drag-tests were conducted to test drum temperature effect on the TempBolt™. The TempBolt™ did not activate due to high drum temperature. Only when the HUB exceeds 250° F does it activate.
- Anytime the oil temperature is consistently over 300° F, bearing failure can occur. At this temperature the oil will lose its lubricity causing the bearings to create more heat and eventually fail.
 - With the activation temperature set at 250° F, the **TempBolt™** warns you BEFORE a failure occurs.
 - In a typical operation, hub oil temperature runs between 150-200° F.
 - The **Globetech TempBolt™** can be used in any hub (tractor or trailer) that has a 5/16" diameter hubcap bolt.
 - When installing, do not exceed 14 ft. lbs. torque.

The **Globetech TempBolt™** is available in a "point-of purchase" display box, containing 50 individual bags of 4 bolts. Encourage your customers to make it part of their preventative maintenance program.

ABS GEN2

Trailer Anti-Lock
Braking System

www.gen2abs.com

Smart ECU. Smart Investment.

Trailer monitoring and control is critical for any fleet or vehicle operator on the road today. From safe stopping to rollover prevention to cargo protection and more, the trailer anti-lock braking system (ABS) plays a key role in productivity and uptime. For maximum time on the road, you need a cost-effective ABS solution that's easy to install and maintain while taking advantage of the latest in communications technology. Introducing Gen2 Trailer ABS. Gen2 allows you to quickly and easily replace your existing trailer ABS electronic control unit

(ECU) for unparalleled trailer monitoring and control with more capabilities. Standard ABS ECUs utilize external tools and software for system diagnostics. Gen2 is a SMART ECU that does not require the use of external software for diagnostics and fault codes. By integrating exclusive control logic into the ABS governing hub and information portal, Gen2 allows for highly efficient diagnostic evaluation and dramatically lower cost of operation.

GEN2 ABS 4S/1M

- Connection to all four ports of valve
 - 2 for front axle
 - 2 for rear axle

- FASTEST GEN2 SYSTEM
- COST LESS
- SENSES ALL FOUR WHEEL ENDS
- ELIMINATES FLAT SPOTS
- EASIEST DROP IN REPLACEMENT
- TANK MOUNT INSTALLATION

- WEIGHS 3 LBS. LESS
- WIFI DIAGNOSTICS
- OUT PERFORMS WABCO'S ABS CYCLE
- REDUCE INVENTORY
- ONLY ONE VALVE USED FOR 4S OR 2S SYSTEM

WABCO 4S/2M

GEN2 ABS 4S/1M

- Exhaust is half of the total exhaust. This equates to release of the tire
- Short width equates to quick stutter of tire break actuation
- Few cycles on build up
- One side is dominant showing an imbalance

- Exhaust has capability to almost completely release tire
- Burst has greater flexibility to control tire
- Pressure builds up more robust to provide greater control
- Symmetry on both sides provides balance to trailer

WABCO 4S/2M ABS CYCLE VS. GEN2 4S/1M

The First to Offer Intelligent Interface

Gen2 offers revolutionary communication capabilities. It is the first trailer ABS to incorporate a WiFi access point that sends diagnostics to any smartphone or tablet. Now you can receive mobile alerts including the most complete diagnostic information without the need for additional software or diagnostic tools. Future plans for Gen2's intelligent interface include additional monitoring capabilities such as brake and pad wear, tire inflation, trailer tracking and more. All to enhance your condition-based trailer maintenance programs.

Take advantage of the industry-first Gen2 intelligent interface and be at the forefront of innovative trailer ABS diagnostic communications.

System Requirements

Gen2 provides reliable performance day in and day out. Whether you need a 2S/1 M single-channel system or a 4S/2M multi-channel system, we offer the right configuration to meet your trailer needs.

2S/1M Basic

A 2-sensor/1-modulator system offers increased assistance to the driver in maintaining directional stability and control while meeting FMVSS 121 requirements.

intelligent interface

Gen2 Advantages

- ECU can be used on existing Meritor WABCO® ABS platforms
- First to offer WiFi interface
- Does not require costly software and tools to maintain
- Diagnostics can be performed from a smartphone or tablet
- No blink code diagnostics needed
- Approved by major OEM trailer manufacturers

Exceptional Support, Mile After Mile

The Gen2 ECU is covered by a 3-year warranty. All other Gen2 system parts are covered by 1-year standard aftermarket warranty.

AIR BRAKES

Rubber Air Brake Hose (Bulk)

Manufactured to OEM Specs

Destructive Tests

Destructive tests are conducted on short specimens of hose, normally 18 inches to 36 inches in length and, as the name implies, the hose is destroyed in the performance of the test.

- A. Burst pressure is recorded as the pressure at which actual rupture of a hose occurs.
- B. A hold test, when required, is a means of determining whether weakness will develop under a given pressure for a specified period of time.

Non-Destructive Tests

- a. Proof pressure test
- b. Change in length test (elongation or contraction)
- c. Change in outside diameter or circumference test
- d. Warp test
- e. Rise test
- f. Twist test
- g. Kink test
- h. Volumetric expansion test

Minimum Hose Bend Radius Data (MBR)

The Bend Radius is the radius of the bent section of a hose measured to the innermost surface of the curved portion. It is important because the minimum bend radius is the maximum amount a hose can be bent without being kinked or damaged.

AIR BRAKE, TYPE A - SAE J1402 & DOT FMVSS 106

Air Brake hose is designed for conveying air in truck and trailer brake systems. Truck and trailer manufacturers, aftermarket installers and wholesalers use this hose. It is certified to meet DOT, FMVSS 106 and SAE J1402A requirements. The EPDM tube and cover with the 4-spiral reinforcement make this hose virtually kink proof. This hose is durable enough to handle this safety related application.

A New Solution for Repairing Damaged Rubber Air Lines

Including

Two nylon shells provide corrosion resistant to improve air system life	One brass fitting with NPTF thread and coating provides tight connection	One assembly ring offers a tight crimping.	One wrench offers a easy installation and reduce residual torque.	One nylon hose barb takes a strong grasp to the rubber hose.

Assembly

Step 1. Cut off the damaged end of the hose. Position hose end on the inside groove of the shell.	Step 2. Insert the brass fitting into the lock shell.	Step 3. Assemble the other side of the shell onto the brass fitting and the hose.	Step 4. Slide the assembly ring over the shell to its final position on the shell.	Step 5. Insert nylon barb into the fitting, turn and push it with the wrench until flush inside the fitting.

Notice:

1. Greasing the nylon barb before inserting it into the fitting.
2. Check final assembly visually to insure that hose has not shifted position during assembly.

Selecting a Slack Adjuster

1. Determine if straight or offset arm. If offset determine if RH or LH needed.
2. Identify spline size (diameter and number of teeth).
3. Select model needed.
4. Determine the arm hole used (if slack contains more than one).
5. Identify bushing diameter.
6. Measure from center of arm hole used to center of splined hole to determine arm length (A).

All Globetech slacks meet the following criteria:

TS16949 Certified
 Meet SAE J1461-91 &
 SAE J1512-90 Standards
 Torque Rating:
 20,000 - 26,000 inch lbs. or
 2,300 - 3,000 Newton
 Meter
 Life time: More than
 200,000 cycles

Air Regulator Valves

All ports: 1/8" NPT
Non-adjustable preset
at 57-65 PSI Replaces:
Haldex KN16743

Part Number	Description
GTA-16743	Oil regulator valve

Automatic Reservoir Drain Valves

Overall height: 2-3/8"
Overall width: 3-3/4"
Port A: 3/8" PT
Port B: 3/8" PT
Adapter: 1/4" PT
Replaces: Bendix 284412 (DV-2)

Part Number	Description
GTA-284412	Automatic reservoir drain valve

Brake Valves

Overall height: 4-5/16"
Delivery Ports: (4) 1/2" PT
Auxiliary Ports: none
Replaces: Bendix 277863 (E-3)

Part Number	Description
GTA-277863	Brake valve (basic)

Overall height: 5-5/8"
Supply Ports: (2) 3/8" PT
Delivery Ports: (2) 3/8" PT
Exhaust at bottom
Replaces: Bendix 286171 (E-6)

Part Number	Description
GTA-286171	Dual brake valve with pedal

Overall height: 5-1/16"
Rear ports: (4) 1/2"
Side Ports: (8) 1/4"
Mounting Studs: (3) 1-1/2" L
Replaces: Bendix 286773 (E-7)

Part Number	Description
GTA-286773*	Dual brake valve (basic) 3 mounting bolts installed
GTA-286771	Dual brake valve (basic)

CAB Control Valves

Delivery Port: 1/4" NPT
Supply Port: 1/4" NPT
Exhaust Port: 1/4" non-threaded
Push/pull, hand control
Knob/name plate not included
Replaces: Sealco 17600

GTA-276566	Control valve
GTA-276567	Control valve

Check Valves & Control Valves

Push/pull, hand operated
 Delivery port: 1/4"
 Supply port: 1/4"
 Exhaust port: 1/4" non threaded
 Replaces: Haldex KN20030
 KN20031

Part Number	Description
GTA-20030	Dash control valve
GTA-20031	Dash control valve

Part Number	Description
GTA-M7102	Dash control valve
GTA-M7102-K	Knobs only

Filter Assemblies

All ports: 1/8" NPT
 Non-adjustable
 Preset at 57-65 PSI
 Replaces: Fuller A-4740

Part Number	Description
GTA-A4740	Filter assembly

Full Function Valves

Spring brake ports: (2) 3/8"
 Service brake ports: (4) 3/8"
 Supply ports: (1) 3/8"
 Control ports: (1) 1/4"
 Reservoir ports: (1) GTA-28600 3/4"
 GTA-28601 1/2"

WARRANTY POLICY

GLOBETECH Manufacturing warrants its products to be free from manufacturing defects for a period of one year from date of shipment. Buyer's exclusive remedy and seller's sole liability hereunder shall be limited to refund of the purchase price or replacement of the product shown to be other than as warranted. Conditions resulting from misuse, negligence, alteration, accident, or improper installation, maintenance, or application shall absolve seller of all liability. The foregoing constitutes the sole warranty of GLOBETECH Manufacturing with respect to its products and in lieu of all other warranties, expressed or implied, including any implied warranties of merchantability or of the fitness for a particular purpose. In no event and under no circumstances, shall GLOBETECH Manufacturing be liable for consequential or special damages.

RETURN POLICY

GLOBETECH Manufacturing will only allow returns upon approval and each return is subject to 25% restocking fee. Custom-made products may not be returned. Each return requires an RGA number issued by GLOBETECH Manufacturing. Customers must pay freight on all returns, and package items in such a way that makes our RGA number clear and obvious. All products must be in excellent condition, suitable for resale. We reserve the right to refuse any and all requests for product returns, based on poor condition of product, or on obsolescence of a particular item or product line. Credit for returns shall be in the form of a credit to customers account for use against further purchase.
